- Dashboards
- Insights

➤ Project Details

Client (York City Bank Inc.) wants a detail reports on their Credit Card sales for the financial year (FY) 2025

❖ January 2025 – December 2025

Our team needs to provide our client with in-depth insights & analysis.

It will help our client to prepare & make strategic decisions for their upcoming market.

➤ Problem Statements

Need to gather data from right sources.

Then design & analyze a comprehensive weekly Credit Card dashboard to generate 'Real Time' insights.

- All data will be segregated into weeks
- Categorize into Quarters – Q1, Q2, Q3, Q4

This will enable key stakeholders to monitor & analyze the CC operations effectively.

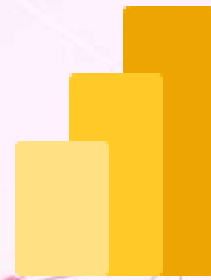

➤ Extraction of Dataset (ETL)

Data are imported to SQL Database and transformed -

- Preparing the csv files
- Creating Databases (cc_db)
- Creating tables (Customers, CC)
- Inserting the values

Later the files are exported from MySQL databases to Power BI for further transformation and analysis.

➤ Data processing & DAX Measures

After importing data into Power BI, cleaned & transformed the data in Power query

Created Column measures –

- Age_Group,
- Income_Group,
- Revenue

Created DAX Measures to get more detailed insights –

- Current_week rev,
- WoW_revenue %, etc.

➤ Dashboard Views

Created dashboard for visualizations using – Bar chart, Matrix table, Slicers, etc.

Currency type – Pounds (GBP) £

➤ Insights: at Week 53 (31st Dec 2025)
